

Plastic Molding ManufacturingPress Release.....

HUDSON, MA - April 28, 2010 - Plastic Molding Mfg., Inc., announced today the acquisition of Res-Tech Corporation, a leader in quality plastic molding services, based in Clinton, Massachusetts. The acquisition involves all of ResTech's assets and it becomes effective immediately.

"The acquisition of Res-Tech by PMM will allow us to execute on our growth plans and to better serve our medical device and healthcare customers", stated Res-Tech's former President John Schmidt. Mr. Schmidt will assume the position of Vice President Customer Relations in the new organization.

With this acquisition, Res-Tech becomes a wholly owned subsidiary of Plastic Molding Mfg., Inc. and will join PMM's molding manufacturing and engineering group. The operations include over 60,000 square feet of manufacturing campus with expansion plans for clean room facilities. Financial terms were not disclosed.

Dick McKenney, President of PMM spoke of the opportunities ahead. "The acquisition significantly increases PMM's manufacturing and engineering capabilities. This will expand our development and engineering services to better assist our customers in developing high quality molded products and assemblies. This is part of our overall strategy to expand manufacturing in the United States offering high quality products at competitive costs."

About Res-Tech:

Res-Tech Corporation, founded in 1976, has manufacturing facilities in Clinton and Leominster, Massachusetts. The company is involved in the contract manufacturing of plastic injection molding parts for a variety of industries including: medical, industrial, defense, automotive, food services and construction. Res-Tech's reported sales were in the range of \$8,000,000.

About Plastic Molding Mfg:

Plastic Molding Mfg., Inc., was first founded in 1982 and is based in Hudson, Massachusetts. The company provides plastic injection molding and engineering support to OEMs and emerging high-tech companies in New England and across the United States. The acquisition significantly increases PMM's manufacturing and engineering assets. As a result, customers will experience improved capabilities in the areas of product development, engineering-design and molding manufacturing.
